1 ABOUT IKAT

The IKAT project, part of the Joint Cluster Initiatives in the Ecosystem Strand Tourism, aims to contribute to the achievement of the updated tourism strategy put forward by the European Commission, following the conclusions reached by the Parliament and the Council pre-post pandemic for the European tourism industrial ecosystem, especially maritime and coastal in the Mediterranean area. To this end, the Euro clusters project IKAT has been set up to tackle the different sectors and agents that make up the industrial ecosystem of Tourism in Europe:

- Maritime and Logistics Clusters
- Tourism Clusters
- Innovation and Water Quality Control Clusters

The services offered to SMEs in the tourism ecosystem (acceleration, innovation, digital and green adaptation, access to finance and internationalization), were designed according to the level of regional vulnerability and their economic dependence on the tourism sector based on the [RIS3 \(European Commission Research and Innovation Smart Specialization Strategy\)](#). The vulnerability index is a range subject to revision that is calculated considering two indicators: tourism intensity and seasonality.

This indicator makes it possible to adjust the product or service granted to the SME according to its location: 1) Regions whose RIS3 have tourism as one of their priority sectors. Mediterranean regions medium level of vulnerability. 2) Mainland Mediterranean regions whose RIS3 is solely tourism and suffer from high vulnerability. 3) Regions made up of islands such as the Balearic, Canary, and Azores. These regions share high vulnerability together with being regions where access and supplies are particularly sensitive to mobility and logistic infrastructures as they suffer from insularity and/or ultra-peripherality.

The main result of the project will be a new specialized Euroclustering IKAT network to address the needs of SMEs in the EU tourism ecosystem that will integrate business alliance partners from Africa and Latin America territories with which the SME-EU share economic and sectorial interests.

The IKAT project has been funded under Call: SMP-COSME-2021-CLUSTER — Joint Cluster Initiatives (EUROCLUSTERS) for Europe's recovery, which comes under Regulation (EU) 2021/690 of the European Parliament and of the Council of 28 April 2021 establishing a programme for the internal market, competitiveness of enterprises, including small and medium-sized enterprises, the area of plants, animals, food and feed, and European statistics, the so-called Single Market Programme.

Specifically, it falls under the specific objective indicated in Article 3(2)(b) for strengthening the competitiveness and sustainability of SMEs and achieving additionality at Union level through measures that: (i) provide various forms of support to SMEs as well as clusters and business network organizations, including in the tourism sector, thereby fostering the growth, scale-up and creation of SMEs.
